WCS Corporate Engagements

The Wildlife Conservation Society saves wildlife and wild places worldwide. With a diverse platform of engagements, we partner with companies on social and environmental initiatives, educational outreach, and advisory services—all for a healthier and more sustainable planet.
WCS conserves over 3.6 million square miles of land and sea in nearly 60 countries worldwide.

We run the world’s largest gorilla, tiger, and elephant field programs.

We are an expert advisor on global regulatory frameworks and best practice standards.

We operate the largest urban network of zoological parks.

We are committed to protecting 50% of the world’s biodiversity.

WCS’s REDD+ project in Madagascar is a carbon offset-based sustainability initiative that yields social, environmental, and economic returns. We engage local communities and partners to reduce deforestation and protect biodiversity within Makira National Park, thus improving long-term livelihood choices and lowering greenhouse gas emissions.
